

# Simplify Your Supplier Lifecycle with Fully Automated Qualification

We've reimaged the entirety of supplier lifecycle management, introducing a modern and highly scalable microservices architecture that paves the way for unparalleled flexibility and configurability. Your supplier qualification can benefit from:

## Auto-Start:

Initiates qualification requests based on supplier status.

## Auto-Scope:

Defines the qualification request scope using scope rules.

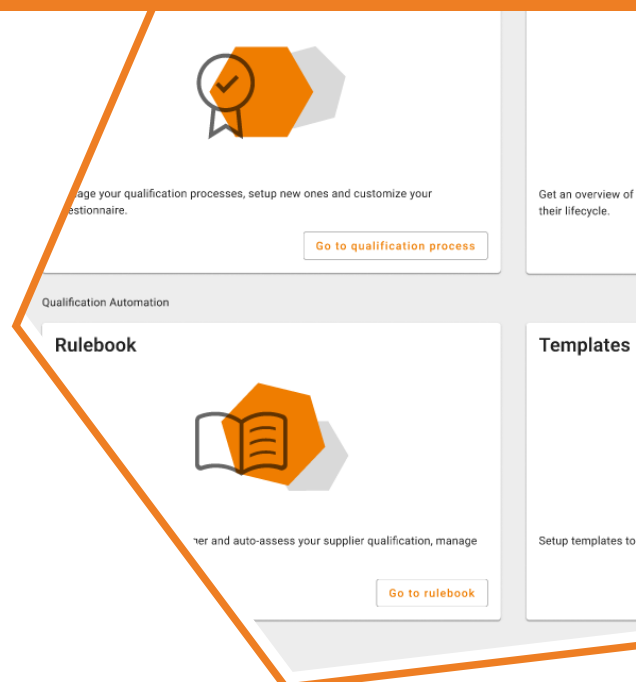

## Auto-Assessment:

Calculates questionnaire scores and weightings.

Create questions with unparalleled flexibility and a modern user experience. We have added **scoring, weighting, and K.O. criteria** to the questionnaire creation process, enabling you to create assessments that are tailored to your unique needs and objectives.

Our **automated supplier qualification** process ensures that internal assessments are objective and eliminates the need for manual intervention. This fosters **sustainable supplier collaboration** and reduces the burden on your team.

With our **user-friendly rulebook**, your team can easily configure all automation rules, providing them with ultimate **flexibility and self-maintenance**.

## Objective Assessments:

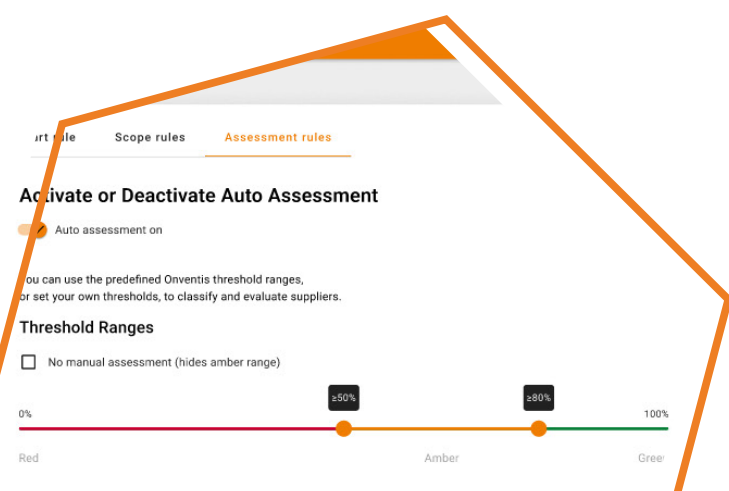

Ensure fairness and accuracy through objective assessments, setting a new standard in supplier management.

## Empower Supplier Collaboration:

Foster sustainable relationships by actively involving suppliers in the qualification process.

## Automation:

Redefine efficiency and save time with our comprehensive automation features.

Elevate your supplier management to unprecedented heights: embrace automation, empower collaboration, and achieve objective assessments effortlessly. Your journey to a more flexible, dynamic, and configurable supplier lifecycle management starts here.
